serves as a Model Code for adoption by all agencies involved in building construction agencies. The Code mainly contains administrative regulations, development control rules and general building requirements; fire safety
requirements; stipulations regarding materials, structural design and construction (including safety); building services; approach to sustainability; and asset and facility management. Part 1 provides uniform essential elements that constitute the minimum regulatory requirements for a safe electrical installation. It covers only dryers
whose electrical equipment, wiring, and accessories are intended to be installed in accordance with the National Electrical Code, ANSI/NFPA 70, or the Canadian Electrical Code, CSA C22.1. This Standard covers dryers having supply voltage ratings of 120, 208, 240, 277, or 480 volts. Retrieved 2017/10/28, original source: [C26-504.7] 27-345
